

TOWN *of* TROY

NO.103

TOWNOFTROY.ORG

FALL 2026

From the Desk of Chair Rowen

Town staff, the Town Board and our partners have made great progress implementing our key improvement projects for 2026!

- The Troy Disposal Center has been successfully expanded and moved to its new location at the Town Hall site at 654 Glover Road, behind the Public Works building. The new site improves flow, capabilities and capacity to support new residents. We are already seeing productivity improvements, freeing up Town staff to focus on other priorities.
- Fire substation construction continues, and with the walls and roof up, it is looking like a real building. In addition to Town staff and the Hudson Fire Department, I want to thank SEH (architect), Berhammer Builders (general contractor) and all of the dedicated subcontractors bringing this new capability to life. With additional volunteer firefighters in training, this new capacity will be operational in early 2027.
- Our major road reconstruction project for the year was St. Annes Parkway. Construction is now complete, with a vastly improved driving surface and enhanced stormwater/curb system that will provide benefits for decades to come.
- The updated Troy Comprehensive Plan is being published for public input, guiding the future evolution and priorities of the Town.
- The Park Board is launching a Town-wide survey to get resident input on enhancements to the park and recreation capabilities available in Troy, including Town-sponsored programs and those offered by valued nonprofit and private organizations that contribute to recreation in Troy.
- Based on the public feedback process, we are continuing to discuss refinements to the proposed Cooperative Boundary Agreement with the City of Hudson. The Town priorities remain the same: enhance Town control over how annexation is implemented, limit the types of development that can be done in Town territory, and enhance landowners' rights to develop under Town of Troy standards. Protecting the character we all value for the long term. Preliminary discussions have started with the new Mayor of River Falls to see if there is a path for similar collaboration on the southern border of Troy.

Thanks to residents who come to informal discussions on Saturday mornings at the Town Hall. I will continue to schedule at least one per month. Now that the Disposal Center is on the same site, feel free to stop in after you drop off your garbage and recycling, or pick up a needed item from Troy-Mart.

Park & Recreation Survey
Fire Substation Updates
November 3rd, 2026 General Election

November 3rd General Election

The November 3, 2026, General Election is approaching! Town of Troy residents are encouraged to visit www.myvote.wi.gov for important election information, including voter registration, polling locations, absentee voting and what's on the ballot.

Residents can also visit the Town of Troy website at www.townoftroy.org for local election notices, voting information and updates. If you have questions, please contact the Town Clerk's office at 715-425-2665. Polls will be open from 7:00 a.m. to 8:00 p.m. on Election Day.

Fire Substation Update

DAVID CARLSON, TOWN ADMINISTRATOR
The Troy Fire Substation for the Hudson Fire Department is well underway, and we anticipate a weather-tight building by October 30th, assuming the weather cooperates.

Starting in November, interior work will begin in both the apparatus bay and the administrative area. If all stays on schedule (as it has so far), we may reach substantial completion in January, with final site work occurring once the frost is out of the ground in April or May 2027.

To ensure work stays on track, Town Chair Doug Rowen and Town Administrator David Carlson have been holding biweekly construction meetings with Brian Bergstrom, architect from SEH, and Ron Lahners, project manager from Berghammer Builders. We have been meeting on-site, discussing change orders and making sure all decisions are being made in a timely manner.

Disposal Center

Troy Disposal Center Opens at New Location!

The Town of Troy Disposal Center has officially moved to its new location at 654 Glover Road, behind the Public Works building at Town Hall. The expanded facility offers increased capacity and improved traffic flow, making it easier and more convenient for residents to drop off garbage and recycling.

Opening day saw a record number of residents! We appreciate everyone's patience and understanding during the transition to the new location.

A big thank you to our Disposal Center and Public Works crews for all their hard work in making this move possible. These improvements will help us better serve Troy residents for years to come!

Preserving Troy's Rural Character While Planning for the Future

The Town of Troy's rural character, open spaces, and strong sense of community make it a special place to call home. As surrounding communities continue to grow, thoughtful planning is essential to preserving what makes Troy unique.

One tool that helps support this goal is our Transfer of Development Rights (TDR) program, which provides opportunities to preserve open space and rural land while directing future development toward more appropriate areas. This approach helps balance growth with the preservation of our town's rural character.

The Town is also updating its Comprehensive Plan, which will help guide future decisions on land use, development, and infrastructure.

We want to hear from you! The Town is seeking public comment on the updated plan, and we encourage residents to share their thoughts. Visit the Town of Troy website for more information and opportunities to provide feedback.

Together, we can plan for the future while protecting what makes Troy special.

Town of Troy Park Information

Cove Boat Ramp

Location: 306A Cove Road

Daily Hours: 6:00 am to 9:30 pm

Use Permit Fees: Residents of WI:
\$10.00 Daily fee or \$70.00 Annual
permit

September 31, 10:00 am to
½ hour after sunset

Fees: None

Amenities: Beach on St. Croix
River, Portable Toilet

Parking: Approximately 16
spaces

Comprehensive Outdoor Recreation Plan 2027-2032

The Park Board is conducting a five-year Comprehensive Outdoor Recreation Plan (CORP), an update to the 2019 plan. This long-range planning effort will guide the Park Board by gathering input from residents, landowners and other stakeholders on current park and recreation facilities, hiking trails, bike/pedestrian routes and future growth of our park and recreation system.

The CORP also satisfies requirements for available funding programs.

As part of this effort, an online survey opened October 15. To learn more and complete the survey, please scan the QR code. Please help spread the word and encourage others to participate!

MEETINGS

Stay connected and involved— our local boards and commissions meet each month:

Plan Commission Meetings – 1st Thursday

Town Board Meetings – 3rd Thursday

Park Board Meetings – 4th Tuesday

Want to stay in the loop? Subscribe to receive meeting notices and agendas straight to your inbox with news & notices.
